Amendment under 37 CFR 1.111 Application No. 10/084,491 March 17, 2003

- 3. (Amended) A safety indwelling syringe as set forth in claim 7, wherein the protective sheath is slidably fitted outside the tubular portion of the fixed sheath.
- 4. (Amended) A safety indwelling syringe as set forth in claim 7, wherein the protective sheath comprises two or more slide sheaths.
- 5. (Amended) A safety indwelling syringe as set forth in claim 7, further comprising:
 - a pair of wings; wherein,
- at least one of the two wings is coupled to the protective sheath so as to be movable with the protective sheath.--
 - -- 7. (Amended) A safety indwelling syringe, comprising:
 - a hollow needle to be inserted into a body of a patient;
- a fixed sheath fixing the hollow needle and having a tubular portion, the tubular portion partially covering the needle; and
- a protective sheath slidably fitted to and guided by the tubular portion of the fixed sheath; wherein,

the protective sheath and the tubular portion of the fixed sheath have a locking means for restricting sliding movement of the protective sheath relative to the tubular portion, and the
